

PT MITRABAHTERA SEGARA SEJATI TBK

The Company Recorded Revenue of US\$15.2 million in 3M21

Jakarta, 28 April 2021 – PT Mitrabahtera Segara Sejati Tbk (MBSS) closed the 3M21 period with revenue of US\$15.2 million, a gross profit of US\$1.3 million, EBITDA of US\$4.3 million and a loss attributable to the owners of the Company of US\$1.6 million. The complete consolidated financial statements for the three months period can be accessed on the Company's website (www.mbss.co.id).

MBSS recorded a total cargo volume of 8.1 million MT in 3M21, compared to 9.2 million MT in 3M20. In line with this decrease in volume, the Company's revenue decreased to US\$15.2 million in 3M21, a 7.3% decline from the 3M20 revenue of US\$16.4 million. The barging segment contributed 70.7% to the Company's revenue whilst the floating crane segment contributed with the remainder.

The rising coal prices' trend that has continued since the end of 2020 has fueled MBSS' hopes that with the current progress of vaccine programs and pandemic prevention, 2021 will see the easing of social restrictions which will lead to a recovery in the economy and sustainable coal demand and prices. In the beginning of March 2021, the Company signed an agreement with PT Asian Bulk Logistics (ABL) to perform coal barging transport with a proposed volume of approximately 1.3 million MT to PLTU Celukan Bawang.

There was a reduction in the number of the assets owned from 62 sets in 3M20 to 56 sets in 3M21. Fewer numbers of sets working led to lower volume transported in the barging segment by 17%, down to 6.0 million MT from 7.2 million MT in the first quarter of 2020. The barging fleet keep on improving their utilisation compared to the pandemic conditions of 2020, with an increased demand in the market, resulting in US\$10.7 million of barging revenue. However, this was still a decrease from US\$12.0 million in the year prior, also led by a reduced number of sets.

In contrast to the reduced revenue in the barging segment, the contribution of the floating crane segment slightly increased with a revenue of US\$4.5 million from US\$4.4 million, or 29.3% of MBSS total revenue. The volume of the cargo handled by the floating cranes also slightly increased to 2.1 million MT from 2.0 million MT in 3M20.

The Company also managed to decrease its direct cost by 6.1% from US\$14.8 million in 3M20 to US\$13.9 million in 3M21. In line with the decreased volume of transported cargo, commercial costs as a component of direct costs also decreased. In addition, there was also a reduction in port charges and anchorage costs. Agency costs also decreased from US\$1.3 million in 3M20 to US\$0.7 million in 3M21 as several routes which have high agency costs experienced fewer trips in 3M21 compared to 3M20. In addition, there was also a reduction in the technical cost, especially for the repairs and maintenance costs, which saw a decrease of 36.3% from US\$2.5 million to US\$1.6 million as the demand for repair costs decreased.
